

PMP Exam Formula Practice Sheet

Make copies of this worksheet, and practice writing out all of the formulas you need to know for the PMP exam. This is great practice for when you take the exam, because at the very beginning of the exam, you should write down all of the formulas on the notepaper they provide you. Then, as you answer questions on the exam, you can just reference the notepaper for a formula, rather than have to recall formulas from memory.

Abbreviation	Name	Formula
